Leon Guerrero-Tenorio Administration Completes \$10M Route 14B (Ypao Road) Road Improvement Project

Tamuning, Guam – The Leon Guerrero-Tenorio Administration celebrated the completion of the Route 14B (Ypao Road) Reconstruction and Widening Phase 1 with a ribbon-cutting ceremony today. The \$10 million project, funded by the Federal Highway Administration and executed by InfraTech International LLC, enhances the critical roadway that connects Route 1 Marine Corps Drive to Route 14 San Vitores Road in Tamuning and Tumon.

“Route 14B, Ypao Road, is a vital artery for our visitor industry, businesses, and residents,” said Governor Leon Guerrero. “We are grateful to the Federal Highway Administration and our local contractors for their support in improving these roadway conditions, benefiting our entire community.”

Lt. Governor Josh Tenorio added, “With Phase 1 completed, residents, pedestrians, and visitors alike can now enjoy safer access and take in the scenic views of Tumon Bay from the newly constructed sidewalks.”

DPW Director Vince Arriola highlighted the administration’s commitment to road safety, emphasizing that the project includes new sidewalks, streetlights, and a retaining wall. He said, “We are excited about the enhanced road system delivered with Phase 1 and look forward to the next phase, which will continue improving road safety.”

The project covers 0.35 miles from Carmen Memorial Drive to San Vitores Road. It includes widening Route 14B to accommodate shared-use bicycle lanes, curbs, gutters, sidewalks, a storm drainage system, retaining walls, and utility relocations.
